Local Government

Streamlining Solutions

Municipal governments and agencies of all sizes face a balancing act today as the public demands ever-increasing services on limited budgets. Finding this balance requires experience with public projects—and that's where we come in. GAI brings clients peace of mind with successful municipal advisement since 1958. We understand local government dynamics and the challenges of moving public projects from concept through to completion.

Technical constraints, environmental impacts, public consensus—GAI is intimately familiar with these obstacles and the intensive coordination and outreach needed to maintain healthy thriving relationships with local residents, businesses, and agencies. Our innovative ideas, time-tested solutions, and budget-conscious methodologies not only make projects successful, they help communities thrive.

At GAI we live, work, and play in the communities we serve, and therefore treat your project—and your dollar—as if they were our own. We serve on local boards and have former city, village, and public works engineers on staff. Our carefully crafted teams take a personal interest and shared sense of responsibility in your projects. We strive to keep an eye to the future while preserving your past—and your pocketbook.

“ [GAI] exceeded our expectations by producing a cost-effective design that is not only sensitive to the community and the environment, but also the Village budget.” - Hales Corners

What Distinguishes GAI
